

**Kick-off Workshop of the
Nuclear Spectroscopy Instrumentation Network
NUSPIN 2016
and
AGATA Physics Workshop
San Servolo (Venice), June 27th – July 1st, 2016**

THIRD CIRCULAR

With this Third Circular of the Kick-off Workshop of the Nuclear Spectroscopy Instrumentation Network, NUSPIN 2016, we would like to call your attention to some news and deadlines.

NuSpIn is a network of ENSAR2 that aims at promoting the mutual coordination between the research groups involved in high-resolution gamma-ray spectroscopy. The objective is to strengthen the nuclear structure community by the exchange and transfer of knowledge and the enhancement of synergies between the different collaborations active in the European Infrastructure Facilities.

The aim of the NUSPIN 2016 Workshop is to present the status of nuclear structure research in Europe and to discuss its perspectives. Sessions will be dedicated to the presentation of recent theoretical studies, the latest results obtained at the international gamma-ray facilities, and the discussion of the challenges of future research, the development of new instrumentation and technical developments with gamma-ray techniques and particle detectors.

Review talks are planned with ample time scheduled for discussion. These reviews will be followed by shorter contributions selected from the submitted abstracts.

AGATA Physics Workshop and Annual Meeting of the AGATA Collaboration

The afternoon of Thursday 30th June and the morning of July 1st will be dedicated to the **AGATA Physics Workshop**, the Annual Meeting of the AGATA Collaboration, and the meeting of the AGATA Collaboration Council.

Meetings of the NUSPIN Scientific Committee and Working Groups.

The afternoon of Tuesday 28th June will be devoted to the meetings of the NUSPIN Scientific Committee and of the Working Groups coordinating the instrumentation developments.

WORKSHOP VENUE

The Workshop will take place at the VIU (Venice International University) located on the island of San Servolo in the Venetian lagoon. The Conference center is situated in a beautiful and expansive parkland with a view of Saint Mark's Square, just an eight minutes waterbus trip away.

REGISTRATION

Participants are invited to register using the registration form available on the web site before the 10th of June 2016.

Courtesy of San Servolo Servizi srl

SOCIAL DINNER

The Social Dinner will take place in San Servolo in the evening of Wednesday 29th June.

TRANSPORTATION IN VENICE

We recommend buying the touristic card “VENEZIAUNICA” as the water-bus tickets are quite expensive. This allows for multiple-day travel and discount tickets in some museums. More information and details on how to arrive to the Island of San Servolo can be found on the Workshop webpage.

ACCOMMODATION

June is high season in Venice. Please make your reservations well in advance. A list of hotels in Venice can be found on the web site of the workshop.

We have pre-booked some rooms in the guesthouse of the VIU in San Servolo. Those who are interested on this accommodation are invited to contact the Conference Secretary as soon as possible.

CORRESPONDENCE

Please address all correspondence by electronic mail to:
NUSPIN 2016 Conference Secretary,
Dr. Elena Pavan
INFN, Sezione di Padova
Via Marzolo 8
I-35131 Padova (Italy)
e-mail: elena.pavan@pd.infn.it

WEBPAGE

Updated information can be found on the web page <http://nuspin.pd.infn.it/nuspin2016>

ORGANIZATION

Organizing Committee

Silvia Lenzi (University and INFN, Padova) (chair)
Andrew Boston (University of Liverpool)
Andres Gadea (IFIC-CSIC, Valencia)
Magdalena Górska (GSI, Darmstadt)
Araceli López-Martens (CSNSM, Orsay)
Santo Lunardi (University and INFN, Padova)
Daniele Mengoni (University and INFN, Padova)
Daniel Napoli (INFN-LNL)
Johan Nyberg (Uppsala University)
Francesco Recchia (University and INFN, Padova)
José Javier Valiente-Dobón (INFN-LNL)

Secretariat

Elena Pavan (INFN, Sezione di Padova)
Adriana Schiavon (Dipartimento di Fisica e Astronomia, University of Padova)

In collaboration with
